1 Syllabus

This online course will provide the participant an opportunity to learn Axyom Femto Information Server. This course is designed with an emphasis on verifying configurations, diagnostics and troubleshooting.

1.1 Audience

Who should participate?

This course is most appropriate for technical professionals who are not typically implementing configurations but rather are in support of the Axyom Femto Information Server such as NOC and support engineers who need to understand how to verify, diagnose and troubleshoot the Femto Information Server after production deployments.

1.2 Topics

Given this written guide and the instructor’s presentation, at the end of this course you will be able to:

- Recognize the role the FIS plays in the Evolved Packet Core
- Identify the AAA protocol the FIS runs
- Correctly order the steps of launching a new FIS server
- Identify the AeMS context for viewing FIS statistics
- Specify how the FIS is provisioned with each type of information it requires
- Identify the categories of Key Performance Indicators (KPIs) the FIS supports
